## Projects

- 2022 – Current

FotballFeber

Solo Entrepreneural project by Mo Web Dev AS

FotballFeber is an online community dedicated to Norwegian football. For the frontend I leveraged a stack consisting of TypeScript, Next.js (App Dir) and React, Lucia-Auth and Drizzle ORM to create a comprehensive platform. The project includes a news aggregation system and a robust authentication system.

Other services include actors on Apify for creating API's from various article sources, MeiliSearch for quick, indexed search, Upstash and BullMQ for message-queueing.

Role: CEO and Full-stack system engineer
