

Eirik Mo

Senior Full-Stack Engineer — AI-augmented, team-scale solo delivery

+47 97 60 22 78 · eirik@mowebdev.com · Žamberk, Czechia · CET · Open to remote contract
mowebdev.com · github.com/estubmo · linkedin.com/in/eiriksmo

Summary

Senior full-stack engineer, 9+ years (React, Next.js, TypeScript, Node.js, GCP). I ship and operate production software solo — at the output of a small team and the quality bar of a senior one — by orchestrating AI coding agents inside a disciplined process: specs, ADRs, architecture fitness functions, and CI-enforced quality gates. Founder and sole engineer of Fotballfeber.com (live). Remote, CET. Open to contract.

Skills

- **Core:** TypeScript, JavaScript, Node.js, SQL
- **Frontend:** React, Next.js, Vue/Nuxt, Tailwind CSS
- **Backend & Data:** Node.js, tRPC, Drizzle/Prisma, PostgreSQL, MySQL, Redis, Meilisearch
- **Cloud & DevOps:** Google Cloud Platform, Docker, CI/CD, Vercel, Fly.io
- **AI-assisted delivery:** Claude Code, Codex, spec-driven workflows, architecture fitness functions
- **Practice:** System architecture, microservices, testing (Vitest, Playwright), monorepos (Turborepo)

Experience

DUCKY AS — SENIOR SOFTWARE ENGINEER

Sep 2024 – Nov 2025 · Remote

- Drove engineering standards across the team through hands-on development and technical leadership.
- Architected scalable backend services on Google Cloud Platform, improving reliability and availability of core services.
- Improved deployment pipelines and developer experience for more predictable delivery.

- Raised code quality and team velocity through collaboration and review.
- Tech: React, TypeScript, Next.js, Node.js, PostgreSQL, Google Cloud.

KNITRY — SENIOR FRONT-END ENGINEER

May 2024 – Aug 2024 · Remote (contract)

- Migrated application state from Redux to TanStack Query, simplifying data flow and improving performance.
- Built core yarn/needle management features from the ground up in React, TypeScript, and Tailwind CSS.
- Managed the Node.js API powering the app.
- Translated Figma mockups into pixel-perfect, responsive interfaces across devices.

SIGNATURE API — SENIOR FRONT-END ENGINEER

Jul 2024 · Remote (contract)

- Audited the signature-ceremony system; categorized and prioritized critical issues by impact and effort.
- Delivered a substantial codebase overhaul: strict SOLID principles, Next.js/React best practices, Zustand state.
- Achieved measurable performance gains and a clean handover.

CHEFFELO AS — FRONT-END ENGINEER

May 2021 – Aug 2022 · Remote (contract)

- Ported a legacy front-end (RetNemt) to a modern stack built from scratch with Next.js, React, TypeScript, and Tailwind CSS.
- Helped consolidate multiple front-end repositories into a single Nx monorepo.
- Built reusable, responsive components (food-delivery calendar, meal cards, account and navigation).
- Partnered with design in Figma to improve UX.

ADTUBE SOLUTIONS AS — FULL-STACK ENGINEER

May 2019 – Apr 2021 · Remote

- Led a small dev team; designed the data model (MongoDB) and built a Node.js GraphQL API exposing campaign-management logic for Facebook, Google, and Instagram ads.

- Built reusable, responsive React components for managing ad campaigns.

WEBTOP SOLUTIONS AS — FULL-STACK ENGINEER

Jul 2016 – Dec 2018 · Trondheim

- Built features across a .NET backend (Entity Framework data layer, REST API) and an AngularJS frontend.
- Acted as the direct line between developers and real-estate-broker clients, improving product quality through a fast feedback loop.

Projects

FOTBALLFEBER — FOUNDER & SOLE ENGINEER

Dec 2022 – Current · Remote · www.fotballfeber.com

Live, solo-built community platform for Norwegian football fans. Built and operated entirely by me by orchestrating AI coding agents inside a disciplined engineering process (specs, ADRs, architecture fitness functions, CI). 78+ shipped engineering phases.

- Designed the entire product and UI in Figma.
- Built a robust authentication system (Next.js, React).
- Built a news-aggregation pipeline: web scraping, BullMQ/Redis microservices, MySQL on PlanetScale, indexed in Meilisearch.
- Shipped interactive VM 2026 games (prediction, survivor, guess-the-player) and a community forum.
- Tech: Next.js, Node.js, TypeScript, React, Tailwind CSS, MySQL, Redis, Meilisearch, Turborepo, Vercel.

Education

Norwegian University of Science and Technology (NTNU), Trondheim — B.S. Computer Engineering *Aug 2013 – Jun 2016*

Languages

Norwegian (Native) · English (Fluent)
